1. Driving Simulator

Drive selected Ford Motor Company models in three exciting new games: Try the *Test Track* and see how you handle the tight turns and the obstacle course, negotiate the freeway traffic in the *City Challenge*, or go for a Sunday drive on *Back Roads*, but watch out for those slow moving trucks! Three levels of difficulty are provided for each game, so you and your friends can play again and again until you've mastered them all.

2. Electronic Showroom

Brilliant computer graphics depict the wide variety of Ford Motor Company models. It's a great way to get a feel for which vehicle may be right for you.

3. Ford Buyer's Guide

Everything you wanted to know about the 1990 Ford Motor Company model line: specifications, standard features, options, prices and more. Choose from approximately 100 models, determine the sticker, then calculate and print out a monthly payment plan. Finding out about cars and trucks has never been this easy.

4. Ford Infocenter

Every year Ford Motor Company introduces a variety of automotive innovations. Now you can see innovation in action with sophisticated computer animations that demonstrate safety, comfort and performance features like never before.

5. Customer Feedback

As always, your opinions and car buying preferences are of interest to Ford Motor Company. This year's questionnaire will help make next year's program even better.

INSTRUCTIONS

Required Equipment

- IBM® PC, PC/XT, PC/AT, PS/2®, or fully compatible computer with a minimum of 512K RAM, Color Graphics Adapter (CGA card or compatible).
- DOS 2.1 or above.
- At least one 3½" floppy disk drive.

Optional Equipment

- Standard ASCII character printer (eg. IBM, Epson®, Okidata®) configured to work with DOS.
- Joystick. (Install as "Joystick A". Follow manufacturer's instructions.)
- Mouse (Microsoft® compatible). (Follow manufacturer's instructions to install.)

Operating the Program

Using a floppy disk drive:

1. Make sure the computer is on and DOS is loaded.
2. Put the Ford Simulator II disk in disk drive A.
3. At the A> prompt, type **Ford** and press the ENTER key. The program begins running at this point.
4. Leave the disk in the drive until you exit the program to DOS.

Using a hard disk:

1. Make sure the computer is on and DOS is loaded.
2. At the C> prompt, type **md\ford** and press the ENTER key. This will create a subdirectory named "Ford".
3. Type **cd\ford** at the C> prompt to enter the directory you have just created.
4. Put the Ford Simulator II disk in disk drive A, type **copy a:.*.*** and press the ENTER key.
5. When the C> prompt appears, remove the disk from the drive. Type **Ford** and press the ENTER key. The program begins running at this point.
6. From now on, to start the program: type **cd\ford** and press the ENTER key to enter the "Ford" directory, then type **Ford** at the C> prompt and press the ENTER key.

A Few Technical Notes

If you use RAM-resident ("Terminate and Stay Resident" or TSR) applications and you encounter trouble running the Ford Simulator II program, make sure you remove them from the computer's memory before you start the program. If the RAM-resident applications you are using do not have a remove or unload function, restart the computer to erase them. It is best to boot DOS from a floppy disk in the A drive that doesn't contain your *autoexec.bat* or *config.sys* files.

If you have problems with your printer, please consult your printer manual and make sure that your printer is configured as the DOS PRN: device.

All prices and product specifications were as accurate as possible at time of disk reproduction. Prices are Manufacturer's Suggested Retail Prices (MSRP), subject to change, and may vary from region to region. Your Ford or Lincoln-Mercury Dealer is the best source for the most current information on prices and equipment.

F-Series Pick-ups presents information on only three models. For additional information on other models, see your local Ford dealer.
